DETAILED ACTION

Allowable Subject Matter

1. Claims 1-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-11 is the inclusion of the limitation of a pair of impedance matching strips formed on the antenna section of the circuit board and each coupled to one of the radiating strips. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 12-19 is the inclusion of the limitation of a pair of opposed radiating and impedance matching traces formed on the first planar surface of the antenna section of the circuit board, the radiating and impedance matching traces each including a radiating strip and an impedance matching strip coupled to the radiating strip, the impedance matching strip having at least a first leg positioned parallel to the radiating strip. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Couture (U.S. Patent No. 5,495,260) teaches a paging receiver comprises a printed circuit board on which receiving circuitry is mounted. The printed circuit board comprises a plurality of conductive runners which form a dipole antenna for providing radio frequency signals to the receiving circuitry. However, Couture does not disclose or

suggest a pair of impedance matching strips formed on the antenna section of the circuit board and each coupled to one of the radiating strips.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
